

Speciality Solutions | **Farm Sentinel Program**
Prevention, protection, peace of mind

Fire is a leading cause of loss for agricultural operations in Canada annually, and a significant number of agricultural fires are caused by an electrical issue which could have been prevented had the proper detection measures been installed.*

Intact Insurance is committed to helping your farm customers protect their operations. The Farm Sentinel Program is designed to reduce the risk of fire in your customers' agricultural operations, through the services of an authorized vendor, which has developed an electrical safety solution that encourages best practices for maintenance and fire prevention.

Simple steps reduce the risks

 <p>Simple installation</p>	 <p>Continuous surveillance</p>	 <p>Detection</p>	 <p>Communication</p>
<p>Smart sensors are installed at the main electrical service by the customer's own electrician. Installation takes approximately two hours.</p>	<p>The sensors installed will monitor for electrical and thermal anomalies and faults on the farm's network - 24/7.</p>	<p>The sensors will detect:</p> <ul style="list-style-type: none"> • Non-conforming cabling and configuration • Motor degradation and faults • Faulty or inadequate ventilation and lighting components • An overheated breaker panel 	<p>If an anomaly is detected, a text message and/or email will be sent to alert the customer and/or their electrician immediately.</p> <p>The customer also has access to a personalized dashboard to assist the diagnostic process and identify faults. The authorized vendor in turn, will provide support that encourages corrective action to take place.</p>

Customer benefits

- The program is simple to set up, with efficient monitoring and reporting processes that update the customer and their electrician in real time.
- The program helps reduce the risk of electrical fires and potential losses as the technology can detect issues and faulty components can be replaced or repaired before a costly fire occurs.
- The solution can help customers manage maintenance efforts and avoid costly operational downtime or premature equipment failure.
- Participating customers that sign up for the monitoring services can save on their annual insurance premium.**

Broker benefits

- Offer your customers the Farm Sentinel Program with confidence, knowing that our authorized vendors have proven solutions to prevent devastating fires.
- Showcase your expertise and the value you provide by offering a solution that proactively protects your customers' livelihood and long-term investments.
- Providing value added consultation that results in loss prevention can lead to higher customer retention.
- You can have fewer fire-related claims to help manage.

** The discount will be applied based on proof of installation. The customer must provide proof to the broker, who in turn provides it to Intact Insurance.
